

Report Cube – The perspective counts

Put your data in a nutshell.

The benefit

Do you want to evaluate and display large amounts of data in real time? And from different levels and perspectives?

With the **Report Cube** we offer you a tool to easily and conveniently compile and view data. Add or remove information fields with just a click. Move your data to draw the conclusions you need.

Due to the automatic processing of the selected data in a cube, even large amounts of data can be processed quickly and clearly according to individual requirements without any programming experience.

All data can be graphically displayed as well!

The Cube

A cube puts your information in a nutshell

Perspective

View your data from different perspectives

Report Cube

The perspective counts
